

TPS Report					
2/25/19					
Brittain Cooke					
Grant Gannon					
Oliver Sanchez					
	Task	Time Estimate	Risk	Who	Review
	Real Time Clock integration	2-3 Days	3	BC	Real time clock added and selected to sync with Westerns time server
	Physical inteface	2 Days	2	BC	Worked on overall design and control of the interface and physical interaction
	SMS over text messaging	2 Days	3	All	The function to send out an email to any of the major carriers has been fleshed out all that's left is to implement into the project at large. The required information to send out a text is their phone number and carrier to be able to send out a message
	Web App	3-4 Days	4	OS	Continued work on web app, currently hosted on a separate testbed could be implemented onto the PI or onto a seperate server. Styling and login services are still wip. Stpes to add users and admins have been added in.
	3D Modeling Software	2-4 Days	2	GG	Investegated other modeling software options because of the learning curve that's imposed by Maya Autodesk. Other solutions such as windows 3d builder, CAD, and blender. CAD seems like the ideal choice, but shares a lot of the challenges that Maya does. Windows 3d builder and blender don't have nice ways to implement actual scale
	Review Stories and TPS Reports	1 Day	2	All	Keep files organized and accessible
