	Task	Time Estimate	Risk	Who	Review	
	Spikes On SMS From PI	2 Days	4	All	One of the project requirements is being able to send a text alert to our administrative user alerting them in the event of a temperature spike. We went and tried to find our best and most cost effective solution for this project.	
	Spike on Logging Temp	2 Days	3	BC	Worked on getting the PI to periodically record the ambient temperature. This too is a project requirement set by our client. It's also critical for our future web app implementation	
	Integrating RTC	2 Days	3	BC/OS	Integrating the Real Time Clock will allow us to track time even when the real time server it checks in with is down. The RTC will be critical for gauging blackout time which we then can log.	
	Look into more case solutions	2-4 Days	2	GG	At this point we're going forward with designing our case, the biggest thing to consider is how to attach the screen onto the case.	
	Review Stories and TPS Reports	1 Day	2	All	Keep files organized and accessible
