TPS Report					
2/18/19					
Brittain Cooke					
Grant Gannon					
Oliver Sanchez					
	Task	Time Estimate	Risk	Who	Review
	Created a physical control	2-3 Days	3	BC	Added some options to be added using the physical controls, this let's the user change settings without remoting in to the pi itself.
	Work on remote accessibility	2 Days	3	BC	Worked on ssh functions of the project. Allowing us to remotely poll the pi for the temperature. Will be critical for future implementation of the user site.
	Spike on WebApp Design	2 Days	3	OS	Working through to decide what our options are for our browser app/access. Worked on making/finding our stye guide for the site to follow. Also worked on finding a method to recieve the data from the pi to then be able to display
	Case Design	2-4 Days	2	GG	Worked on a test iteration of the case design using maya Autodesk, which consisted of the housing for the PI along with mounting for the screen. The major downside is that it's still not housing all the components but not sure if this can be helped.
	Review Stories and TPS Reports	1 Day	2	All	Keep files organized and accessible
